

Economic Growth Region 10

Statistical Data Report for June 2017, Released August 2017

Regional and State Unemployment (seasonally adjusted)

Unemployment rates were lower in June in ten states, higher in two states, and stable in 38 states and the District of Columbia, the U.S. Bureau of Labor Statistics reported. Twenty-seven states had jobless rate decreases from a year earlier and 23 states and the District had little or no change. The national unemployment rate, 4.4 percent, was little changed from May but was 0.5 percentage point lower than in June 2016.

In June, ten states had unemployment rate decreases, the largest of which were in Michigan and Tennessee. Two states had notable rate increases: Maine and Utah. The remaining 38 states and the District of Columbia had jobless rates that were not notably different from those of a month earlier, though some had changes that were at least as large numerically as the significant changes

High school graduates who work full time had median weekly earnings of \$718 in the second quarter

(Excerpted from the Bureau of Labor Statistics, U.S. Department of Labor, *The Economics Daily*)

Median weekly earnings of full-time wage and salary workers age 25 and older were \$909 in the second quarter of 2017. Full-time workers without a high school diploma had median weekly earnings of \$515, compared with \$718 for high school graduates (no college) and \$1,189 for those with a bachelor's degree. Full-time workers with advanced degrees (professional or master's degree and above) had median weekly earnings of \$1,451.

Selected percentiles of usual weekly earnings of full-time wage and salary workers age 25 and older by educational attainment, 2nd quarter 2017 averages, not seasonally adjusted

Source: U.S. Bureau of Labor Statistics.

The lowest paid 10 percent of workers with advanced degrees made \$719 or less per week. That was about the same as the median earnings—the 50th percentile—of high school graduates who had never attended college. Among full-time workers with advanced degrees, the highest earning 10 percent—the 90th percentile—of men made \$3,784 or more per week, compared with \$2,610 or more for the 90th percentile of women.

Full-time workers are those who usually work 35 hours or more per week at their sole or principal job. The median is the midpoint in an earnings distribution; half of workers have earnings above the median and the other half have earnings below the median. The 10th percentile is the point in the earnings distribution at which 10 percent have lower earnings and 90 percent have higher earnings. The 90th percentile is the point in the earnings distribution at which 90 percent have lower earnings and 10 percent have higher earnings.
